
Should humanity establish colonies on Mars?

839 3.6k 1.2k 330 21.6k

Background

A colony on Mars has been a dream for generations recently fueled by Mission to Mars projects by SpaceX or Mars One. Seemingly within grasp, Mars appears as next symbol of humanity's enduring quest for exploration and a boon for technological development. Yet, given the cost involved, is it worth to explore Mars? Shouldn't the resource be better spent elsewhere?

Join the discuss and make your judgment if Mars should be colonized!
