### Content

**Vegan Culture** series: **Music, part 2 - topics (vegan-friendly, not vegan-specific)**. Other parts: [1](#) - Vegan specific songs, [3](#) - block party

----

### Notes:

- The first playlist I created is about vegan-specific songs and this playlist is for vegan topics that aren't directly referring to veganism.
- Will credit contributors.
- **Warning:** The ones with language have an asterisk (\*), by a technicality (has non-vegan elements, but the main person(s)/depiction is vegan (or at least borderline)) have an ampersand (&), and with sensitive material have a carat (^).
  - Note: the clean version of the playlist will include any song that has no symbol (except if it's for the video)
- Part 1 [here](#).

There's a song about Vitamin C from my childhood - it's a kids song that sounds different than the Vitamin Si song, as it goes Vitamin C, C! rather than Vitamin Si Si Si.

Probably late 90s, early 2000s, as it was on cassette. If anyone knows this one - let me know!
