Connotations series: Part 1. Part 2 [here](#).

Idioms, sayings, meanings, proverbs, etc. whatever we call it - there are many old adages that get brought up conversations, yet many of them aren't vegan, although some are. I pulled out the vegan ones to make this list. Now when you talk you can talk like a vegan using only vegan phrases, or at least know about them to recognize and learn about them.

I veganized some non-vegan sayings here: <https://www.buzzfeed.com/branespace/how-to-talk-like-a-vegan-d94irzwn3>

Now I'm continuing the rest of the list in this post when adages that're already vegan and some that need veganizing.
