There are so many vegan investment options now that just didn't exist even a year ago that I bet a lot of people would like to discuss. Since it involves finances, discussing on Discord seems like a perfect place for that.

What will be discussed is anything related to vegan investing - so keep it relevant to that.

Notes:

- It's my first time creating my first discord group. Just trying to connect everyone in one place, as I felt it helped me out and helped companies connect to the resources they need too!
- If it doesn't work, explain below and PM me send a new link. The link shouldn't expire ever.
