

Is principle of pet ownership vegan?

88 69 65 26 164

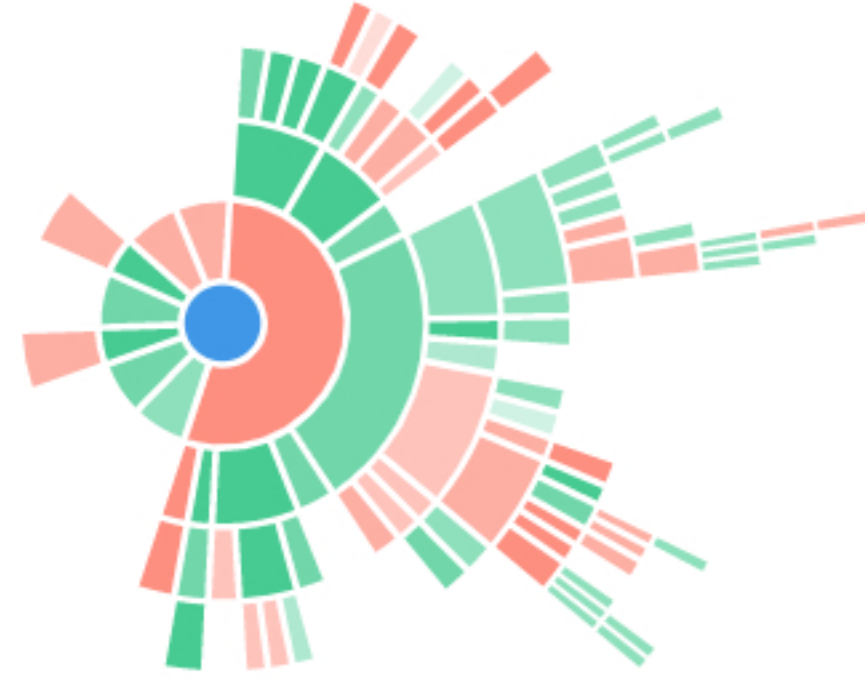

Background

[Background knowledge](#) for this debate. [Definition](#) of veganism.

Some people say pet ownership is not, but many vegans tend to have pets. So the question remains - are they vegan?

Note: this discussion isn't talking about which type of pets are vegan or if the care (food, etc. is vegan) - but the idea of pet ownership. However, if someone needs to specify which type of pet for the purposes of distinction to make their case, that's acceptable.
