We all know the spongebob show on Nickelodeon and the secret formula that makes krabby patties. There's been enough hints now to find out what's going on. The most major one being that it's vegan and so is most of Bikini Bottom - pretty cool! I wrote it all out in my webpage!

I did what was logically next as a vegan - use my own method of decryption to find out what the formula is - using heavy analysis. Except for one of them, each time there was only food that popped up! That means something - I was attuned to it - due to vegan senses lol!

Then I added my own theories and backstory as to how this came to be - the krabby patty being vegan. **Warning** - just realize it's just that - all my own speculation - the entire webpage I wrote - and I even wrote how to improve upon it - in case I am incorrect.
