MERIT Token, called a 'nature-backed' economy - "in which nature will be valued based on the work it does to keep humankind alive every day". Pretty much our money is based on protecting nature to the extent that it helps us - rather than how much we can take from nature.

Buying MERIT Tokens goes towards protecting forest land - by spending money on protecting it. Here's examples of what gets protected:
<https://www.single.earth/landowners>

Now you can start signing up to be a landowner (see bottom of page for the link), but you can't buy any tokens yet.

Keep updated on their discord for details.
