Discussion Title

What is the definition of consciousness?

80

Background

List all definitions as sub-theses and discuss consciousness in the pros/cons. Definitions are not limited by any specific consciousness - like ones in humans for instance - but any definition that can describe any type of consciousness that exist.

Please do not list manifestations as definitions. By manifestations, I mean examples. For instance, showing someone an apple doesn't help to explain what it means. Manifestations, however, can be pro/con sub-arguments of definitions to define its parameters better.
