Cryptofish (1)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

Transhumanism is founded on the assumption that external measures of mechanical efficiency would improve the quality of life for humans. It also assumes that human agency is binary and can be empirically measured. Can kindness, wisdom and love be measured? Are the core values that make life worth living improvable by mechanics? Only the story of hyper industrialized imperialism is the only narrative. It is not.

4hr ago
Rumcorrow (18)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

There are more reliable pathways for human evolution such as the Buddhist enlightenment.

4hr ago
Primate (1.8k)

Machines are all not as efficient as biological bodies. The amount of energy required to keep a human alive is a lot less than a supercomputer. Maybe machines will never be as efficient.

MAKE/FIND CAM

If the current trend of machine improvement continues, machines will surpass biological beings in efficiency.

4hr ago
Synesthesia (1.7k)

human evolution is already not natural, so transhumanism being a non-natural evolutionary advancement will not be anything new.

MAKE/FIND PRO

is so far as the goal of evolution is to maximize adaptability to a given environment, digital tools may enhance this

4hr ago
Primate (1.8k)

Computer and neurocientise technology advanced enough to create humans substantially more advanced than those of today would probably cause an all mechanical extinction before we have the time to even realize what is happening. Is this the end of humanity, and Transhumanism would have to work to follow that if at all.

MAKE/FIND CAM

Hyper-intelligent beings could alter humanity faster than we could imagine.

4hr ago
Primate (1.8k)

Computer and neurocientise technology advanced enough to create humans substantially more advanced than those of today would probably cause an all mechanical extinction before we have the time to even realize what is happening. Is this the end of humanity, and Transhumanism would have to work to follow that if at all.

MAKE/FIND CAM

If the singularity is brought on by an intelligence explosion of transhumanity, transhumanism is the cause of the singularity, not a follow-up.

4hr ago
Primate (1.8k)

Transhumans have traits is competing with complete autonomous and may not be capable enough to survive in the technological singularity. Therefore, the idea of transhumanism, or enhancing humans (as mentioned), being part human, would be below automation, but above humans, in keeping up).

MAKE/FIND CAM

Prior to full automations being developed, humans can enhance themselves to be more capable to expedite the advancement of transhumanism, and produce the AI (technological singularity through transhumanism) while maintaining control over automation technology.

3hr ago
Jack Ad

The quite vast range of medical interventions already adopted – (drug, prosthetics, clinical organs, mucus-based interactions, device implants, gene therapy) – it indicates that there is no great revolution to all types of enhancement.

MAKE/FIND PRO

People with Type 1 diabetes are already using commercially available insulin pumps and continuous glucose monitoring, which are a form of AI, to help manage their condition via commercial products. A growing population are using DIY closed loop Artificial Pancreas solutions. (if example yes

3hr ago
Rumcorrow (27)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

No it's an old theory and not really an 'ism' that has proven to be true. It's not a step in human evolution. It's a step away from human - a natural creature that is meant to be. Is something entirely different could not give them special abilities and only undermine them more.

3hr ago
Rumcorrow (5)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

For all good or all bad we will have humanoids in the future. You know like the Borets man show or the severity to BETTER, FASTER, STRONGER

3hr ago
Ronaldo (5)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

Only if selfaid, zionists have their way.

3hr ago
Kommentatorsekretär (13)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

There is no evidence that 'transhumanism' - the school of thought - is the next step in human evolution - that is heritable characteristics - within human populations.

3hr ago
Kenobi (113)

Transhumanism is the next step in human evolution.

MAKE/FIND PRO

Transhumanism is the logical next step in mankinds evolution. It is also the only way that man will be able to compete with the arrival of emergent AI consciousness.

3hr ago
Mary2 (6)

Everyone benefits from transhumanism. The poor just benefit instead, instead of directly from it.

MAKE/FIND PRO

As the technology for transhumanism becomes more common, it is likely to cost less, making it more accessible for the poor.

3hr ago
CliffordB (2)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

Transhumanism is not considered 'cultural'. Human evolution has not evolved with such decrees, so the biological repercussions are uncertain and may not yield good.

3hr ago
buddhuncy (2)

Transhumanism could speed up human evolution, which provides multiple benefits.

MAKE/FIND PRO

be more than that

3hr ago
Ingolfr (4)

Everyone benefits from transhumanism. The poor just benefit instead, instead of directly from it.

MAKE/FIND CAM

There is no basis to believe that the poor will benefit instead).

3hr ago
Ingolfr (4)

Growing disparities between the uneducated poor and the educated rich are driving instability in societies today. Having a transhuman advantage will likely worsen this situation.

MAKE/FIND PRO

Having a trans-human advantage will likely worsen the situation

3hr ago
shuvilla (1)

Transhumanism is the next step in human evolution.

MAKE/FIND CAM

Will there all Women media machines and control of AI/AGI/Quantum

3hr ago
davchrubek-mBhwpb (11)

Rarely are evolutionary changes self-induced. Transhumanism shows more signs of an evolutionary adaptive mental innovation. Evolution is driven by environmental changes. If AI is the cause of transhumanism, that would be things like artificial body parts, extended longevity, etc.

MAKE/FIND PRO

This could be the use-case where #reality this is TRUE

3hr ago
davchrubek-mBhwpb (11)

Rarely are evolutionary changes self-induced. Transhumanism shows more signs of an evolutionary adaptive mental innovation. Evolution is driven by environmental changes. If AI is the cause of transhumanism, that would be things like artificial body parts, extended longevity, etc.

MAKE/FIND CAM

CLAIM implies that HUMANS are not NATURAL

3hr ago
davchrubek-mBhwpb (11)

The technology that would go into the human body would most likely be AI/AGI/Quantum. Applying this technology on masse would allow for big data collection which can be used for nefarious purposes and against ones own interests. Taking it to the extreme one could argue that it would create an unwilled surveillance state.

MAKE/FIND CAM

MANY HIDDEN ASSUMPTIONS
