In a future where climate change can cause droughts or unpredictable weather, a compact controlled environment can produce reliable food regardless of climate.
SUGGESTED CON
 - 2y ago Gewreid (19)**
Vertical farming requires [Controlled Environment Agriculture techniques](#).
SUGGESTED PRO
 - 2y ago Gewreid (19)**
Top soil would not get stripped away in a vertical farm.
SUGGESTED CON
 - 2y ago Gewreid (19)**
Unlike with certain methods of regenerative agriculture ([cf. go.wikipedia.org](#)), topsoil would not get built in vertical farms either.
SUGGESTED CON
 - 2y ago Gewreid (19)**
Vertical farming creates jobs over time, whereas conventional farming [does not](#) as much.
SUGGESTED CON
 - 2y ago Gewreid (19)**
The food can be much cheaper, if seeds are collected at the end of each harvest, the price of one meal leads to an eternity of that food.
SUGGESTED CON
 - 2y ago deconf (8)**
Cutting out the middleman is bad for those who rely on the role for their income.
SUGGESTED PRO

Vertical Farming Should Replace Current Agricultural Methods

Vertical gardening is great for most garden types. There are many great methods to incorporate together like permaculture. If its windy the vertical suffers, but incorporated into permaculture gardening landscape there are good natural wind breaks to protect the vertical gardening. Another one to incorporate is a keyhole garden, in fact many of them.
