SUGGESTED THESE 1
Using renewable energy is a very good measure since it can play a huge role in fighting against climate change. Reduce, reuse, recycle should be followed. Every country should plant about a million trees or more than a million every year. Beach cleaning machines should be used in every coastline beach and the plastic that is collected should be recycled. This is foloweb@naver.com

SUGGESTED THESE 1
When in 2005 at Gore's film "An Inconvenient Truth" came on about climate change, nobody took him seriously. Yet most of the predictions has come true after only 13 years. The way to address climate change is to both stop increasing population (which is one of the basic reasons that's causing it) and using natural resources to make weapons. This will be possible only when all countries unite, as the climate will not differentiate between who has caused it or not when it creates damage.

Vote for this
Tackle energy

Vote for this
More research and development (R&D)

Vote for this
Rethink and redesign infrastructure

Vote for this
Carbon management (i.e. sink emissions)

Vote for this
Change our behaviors

Vote for this
Modify the food system

Vote for this
Have a new economic system (or mode)

Vote for this
Global politics

Vote for this
Live outside of Earth

Vote for this
Figure out the least contributing form of transportation

Vote for this
Do nothing (politically, behaviorally, etc.)

Vote for this
Change society one person at a time

Vote for this
Create and utilize innovative sci-fi ideas for Earth that already exist

Vote for this
If More Earth away from the Sun until we reach the correct temperature

Vote for this
Catch planetary heat and shoot it into space (like a waterbuck AC, putting it into containers that go into space, etc.)

Vote for this
Promote scientific advancement

Vote for this
Develop weather control systems

Vote for this
Revamp infrastructure

Vote for this
Go to Mars

Vote for this
Large-scale action

Vote for this
Halt construction. Construction might be the industry that emits most CO2.

Vote for this
Stop most factories on Earth

Vote for this
We should remove money from human society to create an economic model based on sustainability, health and open access, as that's what we genuinely need right now to fight climate change

Vote for this
The creation of new services and products need a direct alignment with zero waste, pollution and environmental impact when produced and 100% recycled where possible

Vote for this
Education about birth control and the importance of stopping population growth in general

Vote for this
Capitalism is based on "exploitation" for profit. A transformation into another system may provide a chance towards finding the best measure to prevent it

Vote for this
Citizen initiated afforestation and reforestation campaigns can help mitigate or reverse the impacts of climate change more directly

Vote for this
Governments (individually and collectively) should recognize and focus on climate change more

Vote for this
It is unreasonable for the EPA to declare biomass to be carbon neutral

Vote for this
No one should feel obliged to change their lifestyle to combat global warming

Vote for this
Battery electric vehicles are better than hydrogen fuel cell vehicles

Vote for this
Equilibrium is not sustainable

Vote for this
Should Canada build the Trans Mountain Pipeline Expansion?

Vote for this
Is Low Energy Nuclear Reactor (LENR) technology the solution to fossil fuel burning?

Vote for this
Does use of and coal exploration in the Great Australian Bight should be banned

Vote for this
Wind farms have more advantages than disadvantages

Vote for this
Electricity is a good thing, it will contribute solving the ecological crisis and improve life on earth

Vote for this
The ecological crisis Earth is facing should become the collective and singular focus of society

Vote for this
A carbon tax should be used to subsidize everything that reduces the carbon footprint of consumers

Vote for this
Governments shouldn't subsidize ethanol

Vote for this
The United Nations is the best forum to tackle climate change

Vote for this
The US should adopt a carbon fee and dividend plan to address the primary cause of climate change

Vote for this
Nuclear energy should be used to reduce fossil fuels

Vote for this
Fracking should be banned

Vote for this
The EU should introduce a carbon tax

Vote for this
There should be further research on solar oceanic deserts

Vote for this
Private cars should be forbidden in large cities

Vote for this
Organic farming is better than conventional farming

Vote for this
Infant children is not a good idea when overpopulation exists

Vote for this
Carpooling is the way of the future

Vote for this
Vertical Farms Should Replace Current Agricultural Methods

Vote for this
Universities Should Divest from Fossil Fuels

Vote for this
All humans should be vegan

Vote for this
Renewable energy sources and sufficient energy storage should replace fossil fuels for grid power

Vote for this
Nuclear power: fusion is feasible for sustainable energy production

Vote for this
The world would be better without humans

Vote for this
Should plastic water bottles have a five-cent deposit on every bottle?

Vote for this
Governments all around the world should switch to 100% renewable energy as fast as possible
