I found out that the AFA is relatively unknown - although I knew it quite well. The reason why I knew, is because their patreon page is really low. It's \$16/mth. This org needs \$100 to hire one lobbyist an hour. At least if it's at \$100/mth, it can be 1 lobbyist a month.

This organization provides lobbyists that promote a shift to veganism in the food system in the US:

**At-Risk Farmer & Rancher Diversification & Transitioning Act:** "AFA is lobbying for the "At-Risk Farmer" pilot program which will help struggling livestock farmers exit consolidating animal ag industries and enter lucrative plant-based protein production (or other sustainable and non-exploitative businesses using their land)."

"In advocating for fair subsidies, AFA encourages our legislators to transition our economy towards a just, equitable, and environmentally sustainable system of production."

"AFA advocates for fairness in US agriculture policy and laws, in order to benefit farmers who practice non-exploitative and sustainable farming practices, to benefit animals, to benefit consumers, and to benefit the environment."

"Our lobbying power derives from regular dues-paying members like you | 100% of membership dues go directly to lobbying."
