What is the best economy to have economic path for post-scarcity in the future?

Reason: "Clarified claim"

You (1.8k) · 2y

@vegrinle For whom? I think we should specify this. Otherwise, we receive many claims "but not for countries xxx" or "not for 'yys'" countries" etc.

Parosanto (1.3k) · 2y

@vegrinle wouldn't post-scarcity be worldwide though, hence the "in the future" part. Civilization is probably what we're aiming for if we're to put a name on it.

You (1.8k) · 2y

To make thing clear: You assume that after post-scarcity all countries have more or less the same conditions/resources? If so, I would add this to the info text. @vegrinle

Parosanto (1.3k) · 2y

@vegrinle I'm confused, as the info section does refer to civilization already. Am I missing something?

You (1.8k) · 2y · edited 2y

@vegrinle Sorry I mean we do not deal with the differences between countries but regard them as homogeneous ( Civilization?) Eg in the UBI debate we have the proposition "wealthy countries". Maybe we should further clarify what we mean specifically by "post-scarcity future?"

Parosanto (1.3k) · 2y · edited 2y

@vegrinle It's okay, I'm just confused and will eventually get de-confused. Do I specify what civilization means? This topic really refers to any country willing to change their economic path to account for post-scarcity, because they become post-scarcity. I'm not sure how to word that and thought I did a good job before (but apparently not unfortunately)

You (1.8k) · 2y

@vegrinle All good :) I just wanted to make sure if I understand it correctly. When regards to clarity, as we use the term "post-scarcity", I would add a brief definition.

Parosanto (1.3k) · 2y

@Parosanto fixed

22 Theses

- No monetary economy
- of Fair, automated luxury communism (FALC)
- Resource-Based Economy (of RBE)
- Universal Basic Income (of UBI)
- of Georgism
- Digital token economy - new money, none from real/fiat money
- Demonetization - i.e. digital economy
- UBD (universal basic dividend) powered with blockchain technology. It is immutable, fraud resistant and most suitable in the age of automation. UBD is most adaptive in current socio cultural system! (But nevertheless very difficult to implement.)
- A baby/breeder slot economy for the privilege of having a kid. With limitations on the size and energy expenditure of each person produced.
- Gift economy (of 1, of 2)
- of Socialism
- On-demand hybrid income (ODHI). Asking the government for money when needed, rather than a UBI, where everyone gets the same amount (unequally, instead of equally distributed).
- Digitized of MMT/of monetary market system (a.k.a. fiat or physical money) for virtual environments
- Creative/knowledge-based economy
- Capitalism
- Selectively given income (SGI)
- No changes
- Guaranteed jobs (of 1, of 2).
- Digitized capitalism (i.e. capitalism with no physical money).
- of Healthy countries should provide citizens with a universal basic income (UBI).
- On-demand hybrid income (ODHI)
- of Modern monetary system/of MMT
