

Land boundaries/borders should not exist.

Pros	Cons
<p>Ownership and responsibility for land does NOT equal to penning off people into groups divided by artificial orders that prevent of <u>freedom of movement</u> - which is an innate human need and right.</p>	<p>Helps in better governance</p>
<p>On Earth, with limited land space and a growing population, land will run out with people claiming land and protecting it with their border.</p>	<p>Which can only happen with a one world government, or better stated a one world tyranny.</p>
<p>In an age of globally connected communities facilitated by the internet and advanced communication, trade, relationships and human interactions can no longer be limited by age old borders. National borders must go to create communities that are based on shared values not on physical territory.</p>	<p>Borders allow to determine legal responsibilities. If I make a wrong use of my land, I am responsible. If there are no boundaries, the land belongs to everyone, and nobody is held responsible.</p>
<p>Borders help to contribute to divisiveness among different groups of people. This as a result leads to strong patriotism coming from both parties which can often lead to unnecessary violence, and even dealer conflicts.</p>	<p>Due to of <u>systems theory</u>, boundaries prevent change from occurring within them, so people have a foundation to work from.</p>
<p>Borders/boundaries are arbitrary lines that are not real (except when placed in reality) and thus do not exist.</p>	<p>Boundaries serve a purpose: protect, which is why they exist (because people put them in due to the need and boundaries worked to fulfill it).</p>
<p>Boundaries are just of <u>arbitrary</u> (not realistic) lines that could be decided and changed at any moment. Never-ending changes could be confusing for people to follow.</p>	<p>Boundaries help with understanding each other's image (brand, purpose, personality, etc.).</p>
	<p>Boundaries help establish security and can facilitate economic growth, competitiveness, and equilibria.</p>
	<p>Nature creates natural boundaries (like mountains, for instance), so it's inevitable to avoid them.</p>
