SUGGESTED THESES

Using renewable energy is a very good measure since it can play a huge role in fighting against climate change. Reduce, reuse, recycle should be followed. Every country should plant about a million trees or more than a million every year. Beach cleaning machines should be used in every countries beach and the plastic that is collected should be recycled. This is kollavenkatasivasurya@gmail.com

SUGGESTED THESES

When in 2006 Al Gore's film 'An Inconvenient Truth' came on about climate change, nobody took him seriously. Yet, most of the predictions has come true after only 13 years. The way to address climate change is to both stop increasing population (which is one of the basic reasons that's causing it) and using natural resources to make weapons. This will be possible only when all countries unite, as the climate will not differentiate between who has caused it or not when it creates damage.

SUGGESTED THESES

Cool the Earth by geoengineering, thickening the ice on Arctic sea. Ice reflects sunlight and thus cools the Earth.

Accept Reply

More research and development (R&D).

Rethink and redesign infrastructure

Carbon management (i.e. limit emissions).

Change our behaviors.

Global politics

Live outside of Earth.

Do nothing (politically, behaviorally, etc.).

Create and utilize innovative sci-fi ideas for Earth that already exist.
