

Teleportation would be beneficial if it exists.

Pros	Cons
<p><b>omniface (37)</b> 10mo ago <a href="#">Invite</a></p> <p><b>SUGGESTED PRO</b></p> <p>It would allow others to travel much more quickly</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>	<p><b>admiralrubby (1)</b> 10mo ago <a href="#">Invite</a></p> <p><b>SUGGESTED CON</b></p> <p>One could accidentally teleport to a place that is not safe, for example a place where currently a natural disaster is happening, or a crime is taking place. It is nearly impossible to regulate the areas where one can teleport freely to</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>
<p><b>Al_Langevin (4)</b> 7y ago <a href="#">Invite</a></p> <p><b>SUGGESTED PRO</b></p> <p>It would be beneficial and will open many opportunities to explore. Teleportation might decrease business of vehicles and other transportation businesses, but many new jobs would replace what is lost. A lot of "negative" issues depend on how the teleportation works (is it a machine? or does it biologically allow you to move at incredible speeds?) But if teleportation did exist, the pros definitely outweigh the cons.</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>	<p><b>admiralrubby (1)</b> 10mo ago <a href="#">Invite</a></p> <p><b>SUGGESTED CON</b></p> <p>New rules and regulations would be required for teleportation along with appointed authorities to enforce these rules and keep track of whether the rules are being followed.</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>
<p><b>Loushepherd (1)</b> 7y ago <a href="#">Invite</a></p> <p><b>SUGGESTED PRO</b></p> <p>I think it already exists. Google ley line maps. Google pilot mountain NC portal. Google bigfoot portals.</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>	<p><b>JamesTDG (1.3k)</b> 7y ago <a href="#">Invite</a></p> <p><b>SUGGESTED CON</b></p> <p>A lot of people could be paranoid of the use of teleportation as when you teleport, you are being disintegrated and reintegrated (killed and cloned) the idea of that is too scary for people to use</p> <p><a href="#">Accept</a> <a href="#">Reply</a></p>
<p><b>It's environmentally friendly.</b></p>	<p><b>It would be a detriment to vehicle businesses. For example, train or bus transport industries would be destroyed. The car industry might also be negatively affected.</b></p>
<p><b>It would help provide rapid transportation over great distances.</b></p>	<p><b>Sure, teleportation might be beneficial if it exists, but it won't only do us good. For example drug dealing or weapon dealing. People could just send those things around the world without crossing any countrys/borders. It would be something else if the government keeps the blueprints a secret from public. But if everyone has access to them, then who knows what's gonna happen to this world.</b></p>
<p><b>People can have greater freedom.</b></p>	<p><b>More than one claim</b></p>
<p><b>Travel and colonization in space would be much easier to achieve.</b></p>	<p><b>Transportation is a factor in social mobility, so the teleportation improvement could create/increase the anti-social effects of it.</b></p>
<p><b>It would progress humanity by being another technology that is no longer science fiction, but in reality.</b></p>	<p><b>Teleportation can be dangerous.</b></p>
	<p><b>Teleportation would eliminate the concept of a private space, as anyone could teleport to it.</b></p>
	<p><b>People might feel like teleportation solves more than it does, so it may set people up for failure.</b></p>
	<p><b>Criminals might be able to get away with crimes more easily.</b></p>
