

All institutionalized education should go completely virtual.

Pros	Cons
<p>Online courses have more permanence that lets them be a online resource after a course is over.</p> <p>Digital education addresses problems that regular schools cause.</p> <p>Given our current, widespread technological infrastructure and capabilities for digital adoption, this may be the solution to global educational challenges of access, equity and quality.</p> <p>It's an easier format for the student to work with.</p> <p>Transitioning to virtual education is not difficult.</p> <p>Online education introduces students to continuous technological capabilities, which can inspire them and help them learn valuable technological skills.</p>	<p>No todos tienen la posibilidad de contar con un equipo electrónico.</p> <p>Not entirely. Why does it have to be either or? Why not a hybrid? Not everything is learnable virtually. What is best taught virtually should be offered that way. It is not difficult to determine what can be taught best virtually and what cannot. Small, classes for students to learn how to resolve conflict, share, collaborate, and love each other well are likely all that needs to happen in meat space.</p> <p>There would be a significant loss of jobs.</p> <p>A lack of privacy would become a larger issue.</p> <p>Fully digital education might lead to physical inactivity of students.</p> <p>It doesn't allow for diverse social interaction.</p> <p>It requires electronic equipment, of which students may not have. This would make going virtual infeasible.</p> <p>The family has to be deeply involved every step of the way.</p> <p>Virtual education has less retention.</p> <p>The credits are not accepted as much as brick-and-mortar.</p> <p>Job security would become an issue.</p>
