### Content

"So what is your take on cultured meat? Chances are if you're a vegan reading this you may be somewhat conflicted. On the one hand the idea of eating animal flesh seems repulsive. But at the same time, the new cultured meat industry is dangling the carrot of real animal meats made without cruelty which could call time on the very industry that you despise the most. Oh, and it will be great for the environment too.

"A very tricky ethical dilemma. " "The rise of a new class of food consumer – the Cegans. She also examines how cellular agriculture could massively re-orient our relationship with food."
