Look out for these animal products (ask for synthetic versions):

- [civet oil](#)
- [ambergris](#)
- [Castoreum](#)
- [musk](#)

[Brands that test on animals and those that don't](#) (note, this doesn't automatically mean vegan).

Easy DIY vegan version:

- Add water to spray bottle
- Add drops of essential oils (can be one or [many](#))
- Mix

Warning - do not put peppermint oil on the face - it can cause breakouts

My sister didn't believe it's possible until I taught her - and now she teaches me! She does peppermint + water to keep cool in the summer.
